JAMES STEWART Welcome About the Authors Stewart/Clegg/Watson Calculus: Early Transcendentals, 9e, is now published. Having explored connections between music and mathematics, Stewart has given more than 20 talks worldwide on Mathematics and Music and is planning to write a book that attempts to explain why mathematicians tend to be musical. Stewart was named a Fellow of the Fields Institute in 2002 and was awarded an honorary D.Sc. in 2003 by McMaster University. The alternate version Stewart/Clegg/Watson Calculus, 9e, will publish later this spring. Selected and mentored by James Stewart, Daniel Clegg and Saleem Watson continue Stewart's legacy of providing students with the strongest foundation for a STEM future. Translations of his books include those in Spanish, Portuguese, French, Italian, Korean, Chinese, Greek, and Indonesian. After two years as a postdoctoral fellow at the University of London, he became Professor of Mathematics at McMaster University. He is also co-author, with Lothar Redlin and Saleem Watson, of a series of college algebra and precalculus textbooks. James Stewart received the M.S. degree from Stanford University and the Ph.D. from the University of Toronto. Stewart's books include a series of high school textbooks as well as a best-selling series of calculus textbooks. The maximum number of products that can be compared is 4. His research has been in harmonic analysis and functional analysis. Designed to be an even more usable teaching and learning tool, the 9th edition with WebAssign provides unparalleled clarity and precision, emphasizes problem solving, and develops conceptual understanding. A talented violinist, Stewart was concertmaster of the McMaster Symphony Orchestra for many years and played professionally in the Hamilton Philharmonic Orchestra. The James Stewart Mathematics Centre was opened in October, 2003, at McMaster University. Please refine your selection. The library of the Fields Institute is named after him.
